

Sprint 1 Plan

Product: Digital Butler

Sprint Completion Date: 10/23/2017

Last Revised: 10/12/2017

Goal:

- Familiarize ourselves with JavaScript and refresh on HTML and CSS skills.
- Meet with CEO of Holistic Labs to discuss any extra details about the project.
- Begin working on a functioning interface that allows users to interact with the application.

User story 1:

- As a developer, I want to be proficient with JavaScript, Angular, HTML, CSS, Github, Slack, Adobe, so that I can create an aesthetically pleasing website following the design given by Holistic Labs.

Task 1: Learn the necessary technologies for the web application.

Task 2: Be able to share code among group members.

User Story 2:

- As a developer, I want to familiarize myself with the current Digital Butler website design, so that I will have a better idea on the product.

Task 3: Understand how navigation of the digital butler website works and learn what options would be necessary for the application.

User Story 3:

- As a developer, I want to create a skeleton of the product, so that I have something tangible to present.

Task 4: Allow users to touch/click buttons that the application may have. This will prepare us for the future need of further user interaction with the application.

Team Roles:

- Juan Andreas (Projected Scrum Master)
- Brianna de Carvalho Kavanagh (Projected Product Owner)
- Nima Bazofti (Team Member)
- Scott Davis (Sponsor)
- Avery Sio (Team Member)
- Jeffrey Chan (Team Member)

Initial Task Assignment:

- Task 1: Everyone
- Task 2: Everyone
- Task 3: Everyone
- Task 4: Everyone

Scrum Times: (Subject to change)

Mon: 12-1PM, Tues: 3:40PM, Fri 12-1PM
