What currently does not work as intended or needs to be finished:
- No login authentication
  - Login only works with pressing login button (not enter)
  - Remember me option does not remember anything
  - Changing URL can get user to the main data page without logging in
- popups do not relate to API
- When popups are created, they move when you scroll up or down
- When popups are created, if you scroll down the Chart Component block popups
- Modals do not relate to API
- All modals are the same Modal
- D3 charts do not relate to API
- We only have 3 types of data charts
  - Bubble chart device info. boxes overlap with background
- Resizing issues of cards with contents
  - Text resizing aren't coherent with resizing of window
  - Minimizing and close buttons shift under titles/text when window is resized
  - Report card
    - Tab names
    - Charts would overflow and does not resize appropriately
  - Device Care card
  - Internet Care card
  - Wifi & Local Network card
    - Text in popup not fully inside the popup
  - Toolbar
  - Promos card
- No API information on "Poor Links", "Bandwidth Hogs", "Offline devices"
- Promo card does not display any information
  - No API was provided for promos
- Login button on Navigation Bar would disappear if resized too small.
- Links in the top 3 cards are empty, content of popups from the links are currently irrelevant.
- Date info. Momentarily fades on INTERNET UP/DOWN
